

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## Industrial Insurance in the United States

By CHARLES RICHMOND HENDERSON

**T**HIS book, revised and enlarged for the English-speaking public, has already been published in a German series. The introduction contains a summary of the European laws on working-men's insurance against accident, sickness, invalidism, and old age, with statistics to 1911. The text describes the various forms of social insurance known in the United States and Canada; local clubs and associations, fraternal societies, trade union benefit funds, schemes of large firms, corporations, and railways. One chapter is directed to labor legislation and another to employer's liability laws. Illustrations of the movement are given in chapters on municipal pension plans for policemen, firemen, and teachers; also the military pensions of the federal government and southern states. The appendix supplies bibliography, forms used by firms and corporations, text of bills, and laws on the subject.

448 pages. 8vo. cloth, postpaid \$2.70

I

"I hear it called —  
 'The machine with the human-brain.'  
 I call it The machine  
 with the Super-Human Brain."

Thus spoke the Auditor.

## He was speaking of the Remington Adding and Subtracting Typewriter

(Wahl Adding Mechanism)

This machine does something that only the brain, directing the hand, has hitherto been able to do—that is, write and add (or subtract) on the same page.

But this is not all. It does such work more easily, more rapidly, and more accurately than the human brain has ever performed similar labor.

Thus the machine is human in what it does and super-human in the way it does it.

## Guaranteed Reliability

For nearly sixty years, Bausch & Lomb have been building a reputation for high-grade optical apparatus—the strongest possible guarantee of reliability in

## Bausch and Lomb Microscopes

They combine the highest optical efficiency and mechanical accuracy and are recognized as being most durable instruments. Leading educational institutions accept them as standard for their laboratories.

For all-round school and laboratory work Model F-2, illustrated, is especially recommended. It has a large stage, completely rubber covered, which with the long curved handle arm provides unusual space for object manipulation. The fine adjustment is the well-tried lever form, originally offered by us.

Price of Model F-2, \$31.50

Special Terms to Educational Institutions
